Serving Floridian Communities Since 1983

The Willough is an 87-bed psychiatric hospital located just a block away from the sunny shore of Naples, Florida. We specialize in the treatment of adults with dual diagnosis and mental illness, offering multiple levels of care to meet the needs of our patients.

Total Recovery of Body & Mind through Determination & Compassion

The Willough at Naples is licensed by the Florida Department of Health and accredited by The Joint Commission. Our team of doctors, therapists, nursing staff, and administration meet strict academic & experience standards, and are trained to deliver compassionate, patient, understanding care.

We believe in providing our clients with an environment which addresses each individual's unique physical, emotional, and social needs, while adapting to their changes as they happen. Each person at The Willough has their own limits and goals, which are carefully prepared for and tailored around during their care.

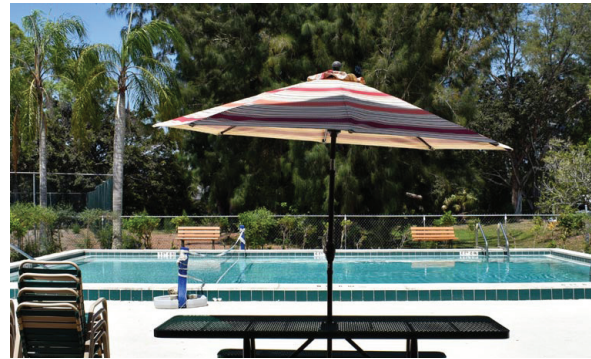

Our Programs

Adult Psychiatric Program

Provides intensive treatment for individuals dealing with medical, emotional, and psychiatric issues in a safe and secure setting

Dual Diagnosis Program

Our dual diagnosis program uses a multi-disciplinary approach to treat a mental health diagnosis while addressing substance abuse issues.

Dual Diagnosis Treatment Services

The Willough at Naples offers treatment programs which address substance abuse addictions with co-occurring behavioral disorders (dual diagnosis), for adults that are 18 years of age or older.

Our services are closely monitored and managed by a skilled team of physicians, nurses, and counselors, assigned in teams to each of our patients, for a length of time that may differ based on the patient's need. Once a patient's stay is complete, their doctor and treatment team determine long-term recovery goals and educate the patient on how to achieve them.

Psychiatric Assessment along with multidisciplinary assessments with nursing, social work / counseling, recreational, and nutrition.
